IRECMS Mumbai 2019 Highlights

Focus **India's Market** IRECMS Patronage

The trend of building gated communities that offer a better, more luxurious and more wholesome living experience is on the rise in India, particularly in Tier 2 and Tier 3 cities. As we rapidly move towards community living, the 'housing societies' that typically exist will not be adequate to run and manage the interests of residents effectively due to lack of bandwidth, commitment and experience. It is inevitable that a team of dedicated professionals will be needed to manage the same on behalf of occupants, in residential and/or commercial spaces. IRECMS will serve as a platform to discuss and predict these future needs of real estate that will help elevate the entire industry to the next level of operations.
