

[Home](#)[About](#)[Why Qute?](#)[Design](#)[Safety](#)[Exports](#)[Newsroom](#)

AN IDEA WHOSE TIME HAS COME

HIGHLY FUEL EFFICIENT

Qute has a higher fuel efficiency of 43 km/kg* – at least 65% more than the most popular small car. It has a 4-valve water cooled DTSi engine with closed loop fuel injection system. The engine is 216 cc and is light weight.

Petrol : 35 km/l* **CNG** : 43 km/kg*

*As per our testing conditions

LOW ON MAINTENANCE COST

Qute has a less complex engine than other 4-wheelers. The vehicle is Made in India and hence, parts are easily available. The maintenance cost is comparable with a 3-wheeler. It is suitable for daily commuting.

EASY TO DRIVE

Qute has the smallest turning radius of 3.5m, which makes it extremely easy to maneuver through congested lanes. Dash mounted sequential shift gears provide comfort in driving. The small size of the vehicle helps in navigating the city traffic and parking in tight spaces.

PROVIDES WEATHER PROTECTION

Qute provides protection from sun and rain. The vehicle navigates better in water-logged conditions as well. It has 12-inch alloy wheels which provide better road grip and is equipped with wipers and washing system for better visibility during harsh weather conditions.
